SQL Fundamentals

Exercise 3: SQL CASE statements

1 Classify each product by price:

```
Select Product_name, Price
Case When Price > 1000 then 'Expensive'
     When Price between 100 and 1000 then 'Mid range'
     When Price < 100 then 'Budget'
     END AS Price_category
From Products;
```

Products_name	Price	Price_category
Laptop	1200.00	Expensive
Phone	800.00	Mid range
Keyboard	45.00	Budget
Monitor	300.00	Mid range
Mouse	25.00	Budget.

2 ~~Label each order~~

```
~~Select Customer_name, amount~~
~~Case When order ≥ 1000 then 'High Value'~~
~~When Medium Value for order~~
```

2 Label each order

```
Select Customer_name, amount, order_id
Case When order ≥ 1000 then 'High value'
     When order between 500 and 999,90 then 'Medium value'
     When low value Order < 500 then 'Low value'
     END AS order_value_category
From orders;
```
